

Northstar Help Center

Customer Guide - Sample knowledge base document

Document ID: NS-HC-2026-01 | Edition: August 2026 | This is fictional sample content for local RAG testing.

1. Accounts and support

Contacting support

Submit requests through the Northstar customer portal. Standard support hours are Monday through Friday, 09:00 to 17:00 UTC, excluding company holidays. A standard support ticket receives an initial response within two business days.

TEST FACT: Standard support operates Monday-Friday, 09:00-17:00 UTC. The initial response target is two business days.

Updating your profile

Open Settings, choose Profile, update the fields, and select Save changes. Display-name changes are visible immediately. A primary email-address change requires confirmation from the new address within 24 hours.

Closing an account

An account owner can request closure under Settings > Account > Close account. Northstar holds the account in a recoverable state for 14 calendar days. After that period, closure becomes permanent and normal sign-in is disabled.

TEST FACT: Account closure has a 14-calendar-day recovery window.

2. Passwords and account security

Resetting a forgotten password

On the sign-in page, select Forgot password, enter the primary email address, and use the single-use link sent by Northstar. The reset link expires 30 minutes after it is issued. Requesting another link immediately invalidates the previous one.

TEST FACT: Password-reset links are single-use and expire after 30 minutes.

Failed sign-in protection

Five consecutive failed sign-in attempts lock the account for 15 minutes. The failed-attempt counter resets after a successful sign-in. Support cannot shorten the automatic lockout period.

TEST FACT: Five failed attempts trigger a 15-minute lockout.

Multi-factor authentication

Northstar supports authenticator applications using time-based one-time passwords. Enabling multi-factor authentication generates 10 single-use recovery codes. Each recovery code can be used once; generating a new set invalidates every unused code from the old set.

Suspicious sessions

Review active sessions under Settings > Security > Sessions. Selecting Revoke all other sessions signs out every device except the current one within five minutes.

3. Billing, plans, and refunds

Invoices and payment dates

Monthly invoices are generated on the first calendar day of each month. Payment is due 14 calendar days after the invoice date. Invoices are available as PDF files under Billing > Invoices.

TEST FACT: Monthly invoices are generated on day 1 and are due 14 calendar days later.

Plan changes

Upgrades take effect immediately and are prorated for the remaining billing period. Downgrades take effect at the start of the next billing period. Changing a plan does not alter existing invoice due dates.

Refund eligibility

A first-time subscription may be refunded when the account owner submits the request within seven calendar days of the initial purchase. Renewal charges and usage-based charges are not eligible for this sample policy. Approved refunds return to the original payment method.

TEST FACT: The first-purchase refund request window is seven calendar days.

Billing record retention

Invoices and payment receipts remain available in the portal for 24 months. Account owners should download older records before they leave the online retention window.

4. Service operations and data

Incident priorities

Northstar classifies incidents as P1 Critical, P2 High, P3 Normal, or P4 Low. A P1 incident means the production service is unavailable to all users or a confirmed active data-loss event is occurring. The P1 initial-response target is 30 minutes at any time of day.

TEST FACT: P1 Critical incidents have a 30-minute initial-response target, 24 hours a day.

Backups

The service creates a database backup every day at 02:00 UTC. Daily backups are retained for 30 calendar days. This sample guide does not promise point-in-time recovery between daily backups.

TEST FACT: Backups run daily at 02:00 UTC and are retained for 30 calendar days.

Exporting workspace data

An account owner can request an export under Settings > Data export. Northstar prepares exports in JSON and CSV formats. The download link remains valid for 72 hours after the export is ready.

Questions this guide does not answer

This document does not specify product pricing, physical office locations, telephone support numbers, regulatory certifications, or future roadmap dates. A grounded assistant should say the knowledge base does not contain those answers rather than inventing them.

TEST FACT: Prepared data-export download links remain valid for 72 hours.
